Priority:	Low

Description

Environment:
Device: iPhone 16 Pro
OS: iOS 26.4
App Version: RAM Syniotec (3.0.1)

Description:
The Operating Hours section on the Equipment Profile screen displays two separate legends with conflicting color mappings for the same data categories. This causes confusion as the user cannot determine which color accurately represents Working Hours and Idle Hours.

Steps to Reproduce:

1. Complete the precondition steps and navigate to the Davaleba Equipment Profile

2. Scroll down to the Operating Hours section (section 4)

3. Observe the legend at the top of the chart

4. Observe the legend at the bottom of the chart

Expected Result:
Both legends display consistent color mappings — the same color should represent the same data category throughout the section.

Actual Result:
The top legend shows red = Working Hours and blue = Idle Hours, while the bottom legend shows blue = Working Hours and orange = Idle Hours. The color mappings directly contradict each other.
